

NEW RELEASE

February 2005

Adaptable and Adaptive Hypermedia Systems

Sherry Y. Chen, Brunel University, UK
George D. Magoulas, Brunel University, UK

Hypermedia systems may be one of the most significant contributions to the Internet in recent years. This powerful new technology has revolutionized the delivery of e-content through the Internet. However, as the needs of users have changed, the hypermedia systems themselves have also changed. In just the past few years, adaptive and adaptable hypermedia systems have emerged. These systems can custom tailor information to individual end-users. The introduction of these systems yields countless benefits for both users and businesses. **Adaptable and Adaptive Hypermedia Systems** examines both types of new hypermedia systems; discussing the benefits, impacts and implications of both. This book covers the most current issues in the field, while providing insight into analytical and architectural aspects of the topic. Additionally, applications are provided in real world setting to allow for a better and more thorough understanding of hypermedia systems.

"This book covers the most current issues in the field, while providing insight into analytical and architectural aspects of the topic."

Table of Contents

- Chapter 1: Literature Review/Research Agenda
- Chapter 2: Issues of Human Factors
- Chapter 3: Metaphors and Navigation
- Chapter 4: Hypermedia Authoring
- Chapter 5: Evaluation Criteria and Methods
- Chapter 6: Methods and Techniques for Customization and Personalization
- Chapter 7: User Modeling in Adaptive Hypermedia
- Chapter 8: Database Technologies in Adaptive Hypermedia
- Chapter 9: Adaptive Learning Environments
- Chapter 10: Customization and Personalization in Electronic Commerce
- Chapter 11: Personalization in Digital Libraries
- Chapter 12: Individualized Search Engines
- Chapter 13: User Centered Evaluation

Adaptable and Adaptive Hypermedia Systems

- *Presents recent advances in adaptive hypermedia research*
- *Demonstrates use in modern applications, including requirements analysis, architectural aspects, modelling techniques, applications development, and evaluation methodologies*
- *Offers users content presentation, interface features, and navigation support that accommodate their needs*

About the Editors

Sherry Y. Chen received her Certificate of Computer Programming from the National Taiwan University, her Doctor of Philosophy in the Department of Information Studies from the University of Sheffield (UK), her Master of Library Science from the University of Maryland (USA), and her Bachelor of Art from Fu Jen Catholic University (Taiwan). Dr. Chen is currently a Lecturer in the Department of Information Systems and Computing at Brunel University (UK).

George D. Magoulas received his Diploma Degree as well as his Ph.D. in Electrical and Computer Engineering at the University of Patras, Greece, and his Post Graduate Certificate in Teaching and Learning in Higher Education from Brunel University, UK. Dr. Magoulas is currently a Lecturer in the Department of Information Systems and Computing at Brunel University, UK.
